COMPANY HISTORY

[www.deltapure.com](http://www.deltapure.com)

## HISTORY

Delta Pure Filtration began manufacturing operations in August, 1983. Our plant and corporate office are located in Ashland, Virginia, U.S.A. We utilize precision winding equipment and use only the highest quality materials to manufacture consistent and reliable filter cartridges. We have a conscientious work force with many of our production associates having over 10 years experience with the company.

Manufacturing operates twenty four hours a day, five days a week. As a result, we offer some of the shortest lead times in the industry. We also stock a good number of standard filters which can be shipped the same day of order.

Delta Pure Filtration's filters are used in various industries and applications around the world. Some of these include:

- Potable Water Treatment
- Waste Water Treatment
- Plating
- Food and Beverage
- Pulp and Paper
- Bio Fuels/Ethanol
- Desalination Pre-Filtration
- Chemical
- Ground Water Remediation
- Oil and Gas
- Power Generation
- Oil and Gas

Delta Pure Filtration is dedicated to providing reliable filtration solutions for our customers. We have a new product development program to incorporate the latest technologies and materials into our product offering. We can also assist in the design of custom filters to meet your specific requirements.

PRODUCT OVERVIEW  
& NOMENCLATURE

[www.deltapure.com](http://www.deltapure.com)

## String Wound Filter Cartridges

The DW series is a proven performer in hundreds of fluid filtration applications around the world. With the availability of twelve filtration media, six support core materials and a variety of end fitting options, the DW series filter cartridges are the cartridge of choice for numerous filter applications.

[DW Series](#)

## Melt Blown Filter Cartridges

MB cartridges provide depth filtration with a gradient density design to trap particles throughout the entire cross section of the filter. The innermost fibers form a tight self-supporting matrix, which eliminates the need for a separate center core. The gradient density allows for optimum dirt holding capacity and minimal change outs.

### [MB Series](#)

## Carbon/Sediment cartridges

DCB and CN04 cartridges are dual media cartridges which provide removal of chlorine, chemical contamination and sediment. The cartridges also improve the taste and odor of water. The CN04 utilizes an inner carbon impregnated media and the DCB has an extruded activate carbon block center core.

## Carbon Filter Cartridges

DWC Series cartridge filters provide removal of chlorine, bad taste and odor, and a wide variety of other contaminants. The DWCC cartridges are an economical solution for potable water and other liquids compatible with Cellulose. The DWCF cartridges contain a coconut carbon impregnated polyester media and offer compatibility with a wide range of liquids such as plating solutions.

## Coconut Carbon Block Cartridges

---

Delta Pure's solid carbon block cartridges provide effective removal of bad taste, odor, chlorine, and various other chemical contaminants. These cartridges are made from premium activated coconut shell carbon. The CCB cartridges are compatible with a wide variety of fluids, from potable water to plating solutions. The large carbon surface area ensures optimal chemical and physical absorption of contaminants.

## Pleated Polypropylene Absolute Rated Cartridges

Delta Pure's PPA Cartridges are designed for use in most applications where absolute rated pleated filtration is required. With 6.5 square feet of filter media per 10 inch length, the PPA Cartridge provides an economical solution for critical applications.

[PPA Series](#)

## Multi-Round Band Clamp Vessel

Delta Pure's BCV multi-round band-clamp cartridge vessels are highly economical solutions for industrial and commercial filtration applications. Complete stainless steel construction and various o-ring materials provide high chemical compatibility and a long service life.

[BCV Series](#)

## Multi-Round Band Clamp Vessel

The GPP Series pleated design offers significantly increased surface area and flow capacity when compared to depth type cartridges. All filters are cleanable and reusable and offer high flow rates with low pressure drops.
